

American Heart Association.

MAKING A DIFFERENCE

COMMUNITY IMPACT IN TEXAS

At the American Heart Association we are committed to advancing cardiovascular health for all, including identifying and removing barriers to health care access and quality.

Across **Texas**, we are fighting for longer lives by making the places where we live, learn work, play, pray and heal as healthy as they can be.

Here's how we are working to keep **Texas** at Heart.

This last year we trained and certified **46,603** Texans in CPR. If performed immediately, CPR can double or triple a victim's chance of survival.

Our Advocacy Team led and supported efforts that resulted in the passage of **12** state and community policies in Texas, that will advance our mission and help make significant progress in the community.

In Texas we are making long-term impacts by focusing on policy, systems and environmental changes (PSE.) Just last year we accomplished **81** PSE's in our local communities.

2,351,900 Texas students got jumping, moving and educated on heart health through our Kids Heart Challenge & American Heart Challenge programs.

We recognized **191** hospitals in Texas for their commitment to patient care and quality outcomes.

YOUR GIFT SAVES AND IMPROVES LIVES!

Currently, the American Heart Association is funding research awards in Texas totaling more than **\$23.8 million**.
